

DOSING GROUP

The dosing group series is the natural complement to the dosing pumps and manual or electric mixers. They can also be combined with containn

APPLICATIONS

- Pools
- Spa
- Industry

FEATURES

- PE high density polyethylene tanks, graduated to allow to view the level of the chemical product within
- Possibility to accommodate the full range of DOSITA metering pumps using mounting bracket
- Screw cap for closing and sealing
- Containment tanks can be used to avoid leakages
- PVDF grommets to prevent oxidation or leakage of chemical fumes
- FKM/VITON standard seals also available upon request EPDM/DUTRAL or silicone

DOSING GROUP

FEATURES

TAN PP tank with suction filter with lip valve and FKM / VITON seals pre-mounted, to allow the metering pump suction. Complete with PVC 4x6 bleeding tube.

TAN + LEV PP tank with suction filter with lip valve and FKM / VITON seals pre-mounted, to allow the metering pump suction. Complete with PVC 4x6 bleeding tube and level probe to stop the dosing when the tank is empty.

GP PP tank with suction filter with lip valve and FKM / VITON seals pre-mounted, to allow the metering pump suction. Complete with PVC 4x6 bleeding tube.
Supplied with DOSITA pump mounting bracket

GPL PP tank with suction filter with lip valve and FKM / VITON seals pre-mounted, to allow the metering pump suction. Complete with PVC 4x6 bleeding tube and level probe to stop the dosing when the tank is empty. Supplied with DOSITA pump mounting bracket

GA PP tank with suction filter with lip valve and FKM / VITON seals pre-mounted, to allow the metering pump suction. Complete with PVC 4x6 bleeding tube. Supplied with pre-drilled holes for housing agitator.

GAL PP tank with suction filter with lip valve and FKM / VITON seals pre-mounted, to allow the metering pump suction. Complete with PVC 4x6 bleeding tube. Supplied with pre-drilled holes for housing agitator. Complete with level probe to stop the dosing when the tank is empty.

GPA PP tank with suction filter with lip valve and FKM / VITON seals pre-mounted, to allow the metering pump suction. Complete with PVC 4x6 bleeding tube. Supplied with pre-drilled holes for housing agitator. Supplied with DOSITA pump mounting bracket.

GPAL PP tank with suction filter with lip valve and FKM / VITON seals pre-mounted, to allow the metering pump suction. Complete with PVC 4x6 bleeding tube. Supplied with pre-drilled holes for housing agitator. Complete with level probe to stop the dosing when the tank is empty and pump mounting bracket
